

RECOVER

Keep business “always on” with DRaaS-tically simple disaster recovery.

DRaaS

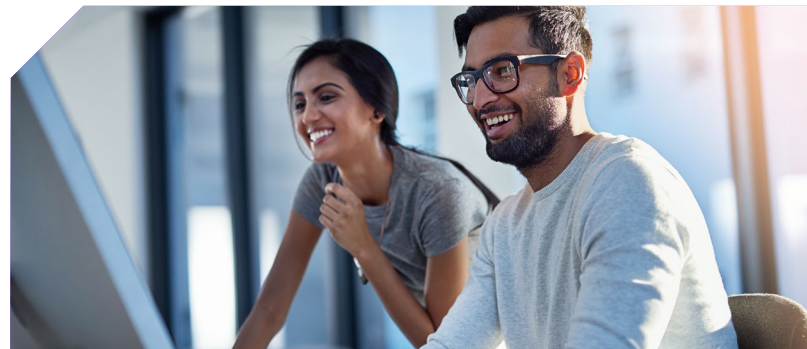

Disaster Recovery
as a Service

Recover in the cloud with the industry leader in disaster recovery.

When something unexpected happens, your organization needs to recover quickly and keep things running for your customers. Whether it's mother nature or human nature at play, you need a disaster recovery (DR) solution that can help you avoid downtime and keep your business from suffering financial cost, damage to your reputation, or worse.

11:11 DRaaS for Veeam—now available with both traditional snapshot-based replication and Continuous Data Protection (CDP)-based replication—delivers the IT protection, recovery, and management capabilities you need to ensure your business remains online and available.

Through deep integration between your on-premises Veeam environment and the 11:11 Cloud, our solution offers simple, secure replication and failover. In the event of a disaster, you can quickly recover via the 11:11 Cloud Console, which provides unified management that extends to all of your Veeam services.

With decades of experience and industry-recognized leadership in DR, 11:11 Systems makes deployment, testing, and failover in the cloud simple and straightforward. Our network flexibility and VMware-based platform provide you with a seamless experience from your onsite infrastructure to the cloud.

11:11 DRaaS for Veeam provides you with a DR solution designed for your unique needs.

DRaaS

Disaster Recovery
as a Service

Key Benefits:

Centralized management and reporting via the award-winning 11:11 Cloud Console

Integrated Veeam replication and failover plan orchestration for recovery in the cloud

Available planning and design services to address organizational requirements

Dedicated compliance support to address geographic and industry regulations

Included 24x7x365 customer support

On-demand, fully managed failover option available for added support

Enterprise-Class Infrastructure:

- Familiar, integrated VMware-based infrastructure and services
- Fully redundant environment, built on leading-edge technology
- Geographic diversity with data centers in the Americas, Europe, Asia, and the Pacific Rim

Since no business is immune to disaster, your DR solution should help you recover quickly.

Our experts will be there, from design and implementation to deployment and testing. Also, for tier-0 and tier-1 workloads that require more aggressive Recovery Point Objectives (RPOs) and Recovery Time Objectives (RTOs), 11:11 DRaaS for Veeam with CDP is now available in select locations. Unlike traditional snapshot-based replication, Veeam's CDP technology allows you to recover in minutes or seconds during failover or failback following a disaster. Finally, test your DR plan at any time via the 11:11 Cloud Console without disrupting normal operations.

Comprehensive Security and Compliance

Every 11:11 Cloud solution includes multi-layered security and compliance, including antivirus, anti-malware, firewall, intrusion detection/prevention, and integrity monitoring. We also provide you with comprehensive reporting for compliance purposes, via the 11:11 Cloud Console.

Need help managing other areas of your IT environment?

11:11 Systems has experts, consulting services, and solutions ready to help strengthen your entire organization so you can truly effect digital transformation across your network. With the right solutions and professional services to assist your internal IT teams, we can help you modernize, protect, and manage your entire environment through our resilient cloud platform.
