

EMPOWER

Optimize your IT infrastructure effortlessly.

FCE
Flexible Cloud
Environment

Get high-performance solutions that meet your changing business needs.

Digital transformation presents the difficulties of managing intricate, constantly evolving workloads while keeping costs in check and maintaining operational efficiency. Often, integrating modern systems with legacy infrastructure presents technical challenges, causing delays and unexpected costs.

11:11 Flexible Cloud Environment is a high-performance, customizable infrastructure solution designed to meet the evolving needs of enterprise customers. It offers a highly scalable and adaptable platform, complete with selective licensing options for Microsoft Services Provider License Agreement (SPLA) and Broadcom VMware Cloud Foundation (VCF). This makes it perfectly suited for virtual desktop infrastructure (VDI) deployments running on Windows desktop operating systems.

This robust platform enhances efficiency and maximizes return on investment (ROI). It also provides businesses with the flexibility they need to meet evolving technology demands.

Comprehensive Features of 11:11 Flexible Cloud Environment

Designed for isolated VDI environments, 11:11 Flexible Cloud Environment also supports Horizon and Citrix deployments. By leveraging Microsoft 365 E3 or higher licenses for Windows desktops, enterprises can significantly cut costs. An isolated vCenter server manages the orchestration layer, ensuring secure and efficient operations. Plus, it integrates easily with your existing monitoring systems, making it ideal for demanding enterprise workloads.

FCEFlexible Cloud
Environment

Optimize costs and scale your infrastructure.

Key Benefits:

High-performance infrastructure
for complex workloads

Scalable and adaptive
to business growth

Flexible licensing options for cost
optimization

Enhanced security and
compliance features

Seamless integration with
existing systems

Additional features:

- Comprehensive onboarding services
- 24x7x365 monitoring and support
- Customizable server configurations
- Rapid deployment capabilities
- Global availability

Need assistance managing other areas of your IT environment?

11:11 Systems offers a team of experts, consulting services, and solutions designed to strengthen your entire organization. Our professional services help modernize, protect, and manage your complete IT environment through our resilient cloud platform.
