

# RESTORE

Ensure you can recover your mainframe when you need to.

**DRaaS**  
Disaster Recovery  
as a Service

## Protect your business-critical mainframes from known and unknown threats.

In today's modern, interconnected business landscape, aging infrastructure poses unique challenges. Whether your team is dealing with limited mainframe expertise, rising support costs, or problems with product updates, recovery might be more difficult than you think.

Running a secondary data center also involves substantial financial commitments, especially when supporting and upgrading aging systems. The suitability of cloud-based services for recovery may be limited, particularly for organizations running legacy mainframes.

**11:11 Mainframe Recovery eliminates concerns about maintaining obsolete systems with a managed recovery solution tailored to your unique challenges.**

In the event of a disaster, our dedicated IT experts provide the infrastructure and resources to keep your critical business operations moving forward.

When disaster strikes, fail over to a secondary site with the infrastructure, including mainframes, that can run your critical business systems, applications, and data. 11:11 has several recovery options available. We will design a solution that meets your business requirements.

## Key Features:

## When you're in a crisis, you can trust our knowledge and expertise.

11:11 Systems brings together more than 40 years of experience in recovery. With seven IBM Mainframes installed in recovery facilities across the US and Canada, we have the right resources in place to manage your mainframe recovery. As threats and incidents rise precipitously every year, you shouldn't leave preparation to chance. Analysts recommend that organizations address recovery events in their risk management strategies, no matter the industry or what computing platforms they may use.

While some thought mainframes would eventually go away, they have been used now for 60+ years and in many cases are essentially irreplaceable with no end in sight. If your business-critical mainframe is hit with a data breach or a natural disaster, 11:11 Mainframe Recovery experts are there every step of the way. From self-service, assisted, or fully managed recovery, our experts are on call to assist with technical issues and questions when you need us most.

## Need to ensure other areas of your business are cyber resilient?

11:11 Systems has experts, consulting services, and solutions ready to help strengthen your entire organization, so you can truly effect digital transformation and cyber resilience across your network. With the right solutions and professional services to empower your IT teams, we can help you modernize, protect, and manage your entire environment from our resilient cloud platform.
