Take database management off your to-do list.

Get proactive management, monitoring, and support for your database environments.

Today's IT departments are being asked to do a lot more with a lot less. Responsible for supporting increasingly complex and critical systems alongside a plethora of internal projects, many are left feeling overworked and overwhelmed. As a result, they have little or no time to focus on what matters most: delivering business value.

11:11 Managed Database Services were designed to alleviate this burden, empowering your internal IT teams with the freedom to refocus their efforts on more critical projects and business objectives.

Our solution — which works in conjunction with 11:11 Managed OS Services — allows you to fully outsource the management of your Microsoft SQL database environments and operating systems on 11:11 Cloud and ensure they remain continuously optimized, updated, and available.

You don't have to do it all.

11:11 Managed DB Services is a logical extension of our world-class managed OS and IaaS capabilities, delivering the proactive administration, monitoring, reporting, and support that today's complex IT landscape demands.

With 11:11 Managed DB Services, your IT team is free to extend and innovate — not spin cycles managing tedious tasks, like updates and patches. From the initial installation, configuration, and onboarding to patch management with world-class process automation, fault resolution and, of course, 24x7x365 monitoring and management, our team can deliver full operational management of your databases — no matter your unique business requirements.

11:11 Managed DB Services simplifies, streamlines, and secures database management.

Key Benefits:

Streamline operations without the complexities of internal DB management

Stay ahead of the curve with database environments that are always optimized, updated, and running at peak performance.

Enhance DB and OS security and reduce downtime with automated updates, patch management, and advanced threat detection.

Collaborate with a team of experienced IT professionals, who have specialized knowledge in DB management.

Reduce operational costs, while freeing IT resources to focus on core business.

Additional features:

- Proactive DB management
- Comprehensive onboarding services
- Competitive, transparent pricing
- 24x7x365 monitoring
- Priority support
- Global availability

Modern solutions for modern businesses.

As IT environments become increasingly more complex, many IT teams are struggling to stay ahead of the curve. When it comes to DB and OS management, updates and patches are critical, but also particularly difficult to proactively maintain when time and resources are limited.

With 11:11 Managed DB Services in conjunction with Managed OS Services, we'll work with you to keep your database environments and operating systems up-to-date with the latest features and security patches, while also working with you to align to your OS-related security and change management policies. Thanks to automation, we can also add significant business value through intelligent observability of potential problem areas, such as identification of critical day-zero vulnerability patches.

Need help managing other areas of your IT environment?

11:11 Systems has experts, consulting services, and solutions ready to help strengthen your entire organization so you can truly effect digital transformation across your network. With the right solutions and professional services to assist your internal IT teams, we can help you modernize, protect, and manage your entire environment through our resilient cloud platform.
