

INTERCONNECT

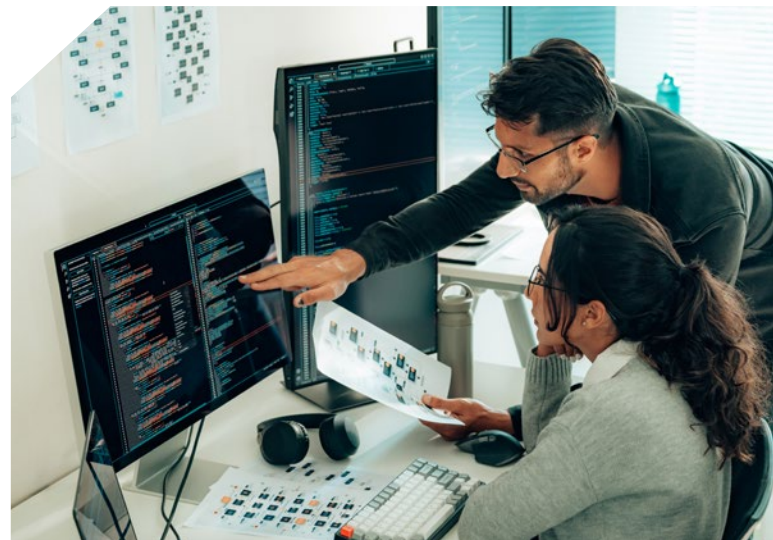

Connect seamlessly across
all of your environments.

Conn
Connectivity

Optimize your network with fully managed internet connectivity.

Businesses today rely on robust, reliable internet connectivity to keep operations running smoothly and ensure seamless communication, productivity, and customer satisfaction. However, navigating the complexities of multi-service connections, achieving redundancy to avoid downtime, and optimizing network efficiency can be a significant challenge. IT professionals managing diverse and evolving environments often face the daunting task of balancing performance, security, and scalability while addressing growing demands of modern business operations while maximizing your Return on Investment (ROI).

11:11 Managed Internet is specifically designed for colocation customers and IT professionals who need reliable, resilient, and simplified internet connectivity to support their operations. Built on our advanced backbone infrastructure and proprietary IP space, 11:11 Managed Internet offers secure, flexible, and high-performance internet access that you can depend on. With dual-feed connectivity backed by robust service-level agreements (SLAs), this service ensures uninterrupted performance and high availability, even during peak usage or unexpected disruptions. Whether you're running critical applications, managing data centers, or supporting complex IT environments.

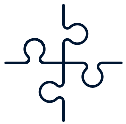

11:11 Managed Internet provides the reliability and security you need to stay connected and productive.

Key Benefits:

Unmatched Connectivity Across Environment

Easily connect to on-premises systems, hyperscale cloud providers, 11:11 environments, and third-party on ramps seamlessly, within our unified, software-defined network fabric. Our platform ensures secure, high-performance connectivity, simplifying complex integrations and enabling efficient data flow across diverse environments.

Simplified Multi-Service Configuration

Simplify your IT management and boost your team's speed to market with our all-in-one managed connection. Connect to essential services like Infrastructure as a Service (IaaS), Disaster Recovery as a Service (DRaaS), and Backup as a Service (BaaS) effortlessly—all on a single, secure platform. With built-in security to protect your data wherever it resides, our scalable and efficient solutions are tailored to meet your business needs. Spend less time managing IT and more time driving your business forward.

Redundant Dual-Feed Service

Enjoy peace of mind with SLA-backed redundancy and dual-feed managed internet, designed to provide maximum reliability and performance. These features ensure consistent uptime and operational stability, even during unexpected network disruptions, making them ideal for supporting business-critical workloads and maintaining seamless productivity.

Optimize Performance with Layer 2 and Layer 3 Options

Tailored to your organization's specific needs, 11:11 offers scalable Layer 2 and Layer 3 connectivity solutions designed to adapt as your business grows. Our services guarantee high performance, reliability, and robust security from end to end, ensuring seamless communication and data transfer across your network. Whether you're managing a small team or a large enterprise, 11:11 delivers the connectivity you can trust.

Need help managing other areas of your IT environment?

11:11 Systems has experts, consulting services, and solutions ready to help strengthen your entire organization so you can truly effect digital transformation across your network. With the right solutions and professional services to assist your internal IT teams, we can help you modernize, protect, and manage your entire environment from our resilient cloud platform.
