

ACCELERATE

Fast-track your public cloud transformation.

Achieve optimal performance at any stage of your cloud journey.

No two organizations are exactly alike, which means no two cloud journeys are exactly alike. Or at least they shouldn't be. Wherever your organization lies on its path toward digital transformation — whether just beginning or having already moved workloads to the cloud — you likely have a set of requirements, concerns, and challenges that are wholly your own.

However, “unique” doesn't have to mean “alone.”

Designed to help customers navigate this complex and often challenging journey, 11:11 Managed Public Cloud Services combines the power and reach of leading public cloud providers, like AWS and Azure, with dedicated, comprehensive management and monitoring.

The right public cloud for your business — at the right price.

11:11 Managed Cloud Services helps unlock the scalability, performance, and reliability of the public cloud, while also delivering the comprehensive management, world-class support, in-depth security, transparent pricing, and around-the-clock monitoring your business requires.

Tailored to meet the specific needs of your business, **11:11 Managed Public Cloud for AWS** and **11:11 Managed Public Cloud for Azure** are currently available in three tiers. Choose the tier that's right for your business while ensuring predictable cost structures that allow you align costs directly with usage and scale cloud services with ease.

11:11 Managed Public Cloud helps you navigate security concerns, governance, and cost.

Backed by years of experience working with top public cloud providers, our team of certified cloud experts partner with you to seamlessly and securely manage your data and applications, freeing your internal teams to focus on what matters most: delivering business value.

As a *de facto* extension of your IT team, 11:11 helps your business maximize the public cloud by ensuring you meet or exceed security, compliance, and performance standards. We collaborate directly with you to transform and migrate your organization's critical data and workloads quickly and securely. With certified specialists in Architecture, DevOps, Security, and Sysops, 11:11 adheres to your public cloud provider's best practices while optimizing cost and performance.

Whether you're partnering with AWS or Azure, 11:11 also offers comprehensive public cloud migration services including planning, onboarding, and support with multi-layered security, geographic or industry-specific compliance, and complete backup protection for mission-critical workloads.

Key Benefits:

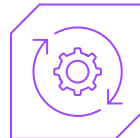

24x7x365 monitoring and alerting

Reports and dashboards

Backup with restoration

Next-generation managed service and automation across the two leading public cloud platforms, Azure and AWS

Optional IT Operations Management including customer application monitoring

Optional infrastructure DR design and implementation

Need help with other areas of your digital transformation?
