

PROTECT

Mind the gaps in your data protection with 11:11 Cloud Backup for Microsoft 365.

365
Microsoft 365

Make sure your Microsoft 365 data is safe and secure with dedicated, cloud-to-cloud backup.

You may not realize it, but protecting Microsoft 365 data is a shared responsibility. Microsoft is accountable for making sure the application and infrastructure are all working—but the actual data protection falls squarely with your organization. If you aren't protecting your 365 data, you may be leaving your business vulnerable to cybercriminals.

Eliminate the retention gap with 11:11 Cloud Backup for Microsoft 365. We can help you protect valuable 365 data, such as emails, contacts, and files in Exchange, SharePoint, Teams, and OneDrive. Now you can be prepared to address ransomware, insider attacks, and other disasters. The right cloud-based backup solution helps you eliminate Microsoft 365 data retention and business continuity issues, regardless of where your data may be stored, while also addressing compliance and legal requirements.

Protect your business data with comprehensive, cloud-to-cloud backup.

11:11 Cloud Backup for Microsoft 365 leverages Veeam's industry-leading software to give you unparalleled protection of your 365 environment:

- Secondary, immutable backup copy
- Fully configurable retention periods
- End-to-end encryption

Our joint solution also provides you with cloud-to-cloud backup with less complexity and greater data control and management.

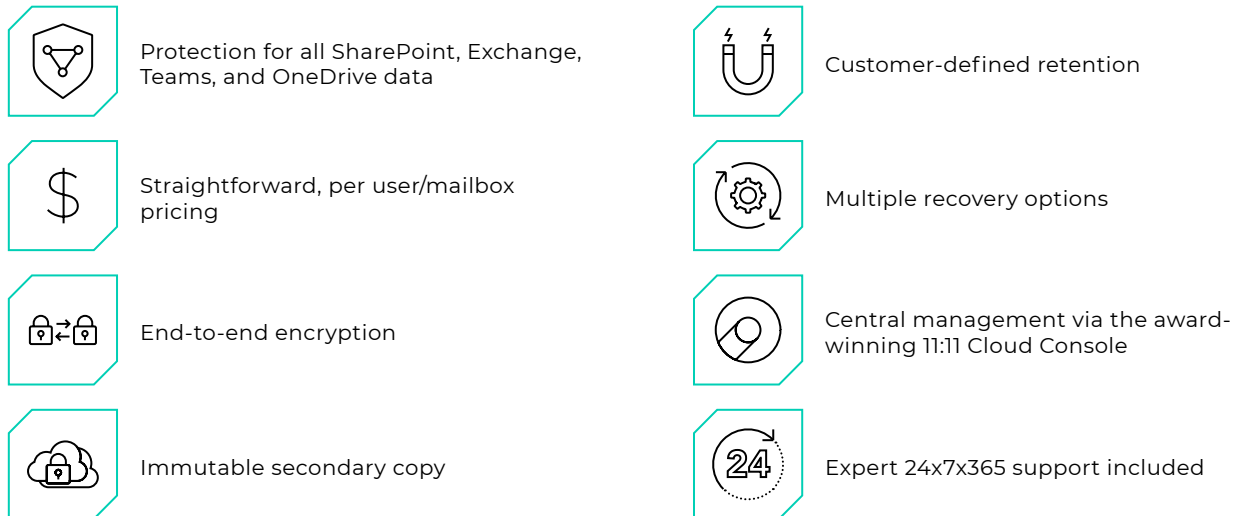

Trust industry leaders to protect Microsoft 365 data.

Both Veeam and 11:11 Systems are industry leaders in data protection. That's why you can count on us to secure your M365 data. With 11:11 Cloud Backup for Microsoft 365 you can ensure your valuable productivity data can be recovered when you need it.

Protect your Microsoft 365 data with an immutable secondary backup.

Key Benefits:

No matter where your data is, security is essential.

11:11 Cloud Backup for Microsoft 365 provides essential data security in the public and private cloud, offering complete and cost-effective protection against accidental or deliberate data deletion, malicious activities, and ransomware attacks. If your organization needs to meet industry or governmental regulations for data archives, we can help make sure you are in compliance and have future access to your M365 data. Get the benefit of our unprecedented expertise in data protection through our award-winning 11:11 Console, so you can effortlessly monitor and manage 365 backups. With our comprehensive security measures, you can also improve your cyber resilience and defend against evolving cybersecurity threats.

Many Ways to Recover:

- Restore Exchange, SharePoint, OneDrive, and Teams data
- Export objects to a Personal Storage Table (.pst) file
- Save mailbox items as a Microsoft Outlook (.msg) file
- Send items as attachments to specific recipients
- Download individual objects as files or groups of objects as a .zip file

Need help managing other areas of your IT environment?
