SD-WAN

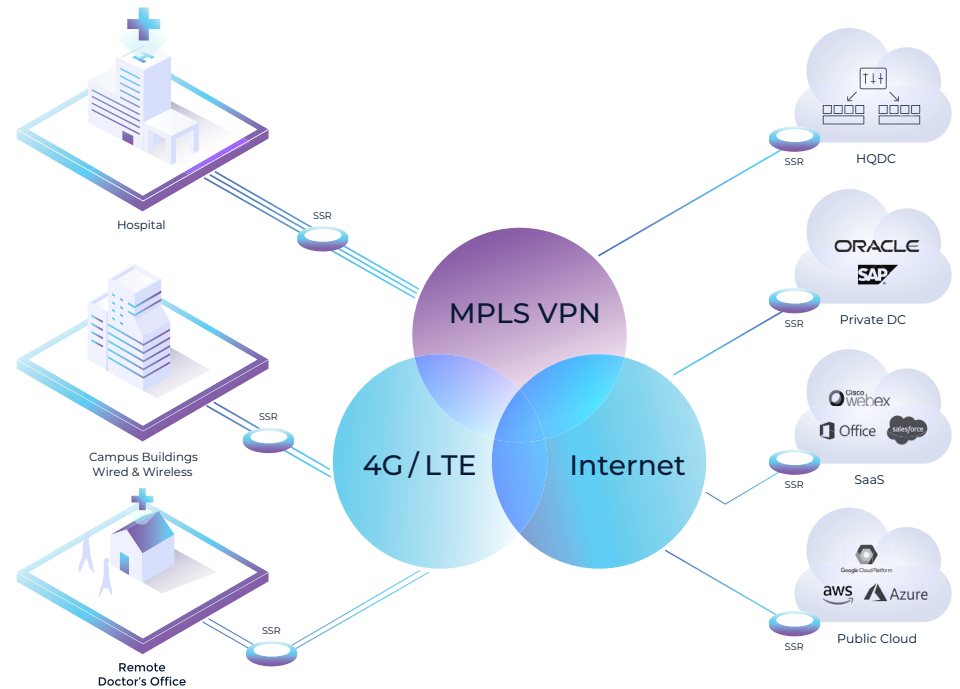

LEVERAGING SD-WAN FOR A PATIENT-CENTERED EXPERIENCE

OPPORTUNITY

A large healthcare system provider is growing rapidly as it supports 45 hospitals and specialty outpatient care centers serving thousands of patients across multiple states. The provider needs to transform its Wide Area Network environment to deliver more robust and agile capabilities and provide a seamless, technology-enabled, patient-centered experience.

SOLUTION

11:11 Systems designs and deploys a Managed SD-WAN solution with Smart Session routing to enable high availability, seamless scalability, simplified cloud access, and proactive problem identification and remediation - all delivered from the "Everything Connected" platform.

KEY RESULTS

- Reduction in time to onboard new healthcare sites - from 60 days to just 5 days
- Increased capacity and resiliency at a lower cost per megabit
- Traffic prioritization to ensure seamless video, voice, and records transfer between doctors and patients
- 24/7 monitoring through 11:11 platform and NOC Team to ensure performance
- Seamless layering and access to new applications across their portfolios
- High-performance security to ensure HIPAA compliance
