

11:11 OVERVIEW

11:11 Systems delivers proven enterprise cloud, connectivity, and security solutions so you can ensure your apps and data are always running, accessible, and protected.

11:11 SYSTEMS CLOUD PLATFORM

DRaaS

Replicate applications and data to the 11:11 Cloud and fail over operations with near-zero recovery times.

Cloud Object Storage

Seamlessly extend on-premises storage to the 11:11 Cloud and efficiently secure, manage, and retain data for the long term.

Cloud Hosting

Securely host workloads in our proven, VMware-based cloud platform that includes built-in support, security, and compliance.

Cloud Backup

Protect data from internal and external threats with cloud backup integrated with Veeam Cloud Connect.

Microsoft 365 Backup

Back up and protect Microsoft 365, including Exchange, Sharepoint, Teams, and OneDrive data.

11:11 SYSTEMS MANAGED SECURITY PLATFORM

Managed Firewall

Protect the perimeter with advanced technology managed by a 24/7/365 team of security experts.

Continuous Risk Scanning

Identify, remediate, and report on security vulnerabilities in systems and networks.

Managed SIEM

Detect threats across your IT environment through centralized logging, automation, and analysis.

Managed EDR

Prevent security breaches on endpoints with real-time detection based on your security policies.
