Protect applications and data, no matter where they live.

MANAGED SERVICES

11:11 Solutions for AWS

Technology allows modern businesses to tackle new challenges and adapt quickly to constant organizational and economic upheaval. But it isn't always easy to keep up with the fast pace and constant changes, not only in the marketplace, but even within IT itself.

Few organizations are even able to hire all of the IT expertise required to keep business running smoothly. With tighter budgets and talent shortages, the right staff may not even be available.

This is why many organizations are leveraging managed services to identify key gaps, provide expertise, improve infrastructure, protect data, and address risk across the enterprise. This allows internal teams to then focus instead on driving revenue, reinforcing business innovation, and improving customer experiences.

The 11:11 Difference

11:11 Systems holistically addresses next-generation technology challenges with end-to-end cloud, connectivity, and security managed services. Through our integrated, state-of-the-art platform that ensures applications and data are always running, accessible, and protected, we empower our customers to "Rethink Connected."

11:11 Systems provides:

-  Data protection and disaster recovery services
-  Infrastructure as a service, including managed cloud services
-  Managed security services
-  Managed connectivity services

You can also take advantage of competitive costs and 11:11 Systems' wholesale pricing on AWS services via our Enterprise Discount Program.

RETHINK CONNECTED

11:11 Solutions protect data, reduce risk, and improve infrastructure to help you focus on your business.

Our solutions provide next-generation cloud, connectivity, and security managed services, leveraging the best and largest cloud platform in the world, AWS.

Key 11:11 Solutions for AWS:

Object Storage

Simplified Amazon S3 object storage – competitive, all-inclusive wholesale pricing, free of egress, retrieval, API-related fees – for immutable archiving, cyber recovery, and data security

Backup as a Service

Cloud backup to AWS using Veeam Cloud Connect

Managed Backup for AWS

Fully managed, VPC-level or AWS service backup to any AWS cloud region

Microsoft 365 Backup

Highly performant Microsoft 365 backup to AWS, leveraging Veeam best-in-class backup technology, including data protection for Exchange, Teams, SharePoint, and OneDrive

Managed DRaaS for AWS

Fully managed disaster recovery as a service, leveraging AWS DRS technology, for virtual or physical servers, from customer locations to AWS, or AWS to AWS (across cloud regions)

Managed Recovery

Fully managed DR — including recovery from AWS to on-premises environments — providing automation, change management, expert validation, and support for a range of operating systems, applications, and data protection technologies

AWS Direct Connect and SD-WAN

Fully managed last-mile connectivity and network routing

Consulting Services

Managed AWS Cloud consulting services, including network, disaster recovery, and business continuity expertise to fill in the gaps before cloud migration or other AWS adoption projects

Do you need help managing other areas of your IT environment?

11:11 Systems has experts, consulting services, and solutions ready to help strengthen your infrastructure and truly effect digital transformation across your entire organization. With the right cloud, connectivity, and security solutions as well as professional services to assist your internal IT teams, we can ensure your systems and data are always running, accessible, and protected.
