PREVENT
Stop security breaches at their source.

XDR
Extended Detection and Response

Detect and actively prevent malicious attacks in real time.

Cybercriminals are increasingly targeting end users as their primary entry point, especially with the rise of remote work, which places users beyond the protective perimeter of corporate networks. At the same time, infiltration techniques have grown increasingly sophisticated, making it harder for traditional detection methods to keep pace.

11:11 Extended Detection and Response (XDR) takes cybersecurity to the next level by going beyond monitoring endpoints. Leveraging Trend Micro technology, our managed solution integrates advanced computer intelligence with human expertise across an organization's entire IT infrastructure for a more robust line of defense. 11:11 XDR combines the capabilities of an Endpoint Detection and Response (EDR) Agent, XDR Sensor that ingests log activity, skilled professionals, and proven processes to detect, investigate, and respond to cyber threats in real time.

This multilayered approach not only accelerates threat identification and provides deeper context but also uncovers and addresses threats that might otherwise go unnoticed. 11:11 XDR is a proactive and comprehensive solution to help your organization stay ahead of evolving and expanding cyber risks.

11:11 SYSTEMS

Boost Your IT Infrastructure with Seamless, Disruption-Free Security.

Fortify your IT infrastructure with robust security—seamlessly, without disrupting your networks or customers.
Comprehensive Endpoint Security
Protect devices with signature-based antimalware, behavioral analysis, and intrusion prevention.
Advanced Reporting
Get trend-based reports and compliance insights.

Detect Threats
With comprehensive log ingestion, collect and analyze activity from across your protected endpoints.
Cyber Risk Exposure Measurement (CREM)
Proactively uncover, predict, assess, and mitigate cyber risks.

Data Loss Prevention (DLP)
Safeguard sensitive data across endpoints and servers.

24x7x365 Support
Get experienced log analysis and reporting, along with actionable data from the 11:11 Security Operations Center (SOC).

Customizable Dashboards
Provide tailored visibility with role-based permissions and executive dashboards.

Get Dedicated Expertise.

Real-time detection enables your team to quickly remediate issues before they impact your organization. Our SOC includes dedicated security analysts who work to identify and respond to data breaches and cyber incidents. Our team will work with your organization's security policies to help ensure nothing is missed and that you strike the proper balance between security and user impact.

Need help transforming other areas of your environment?

11:11 Systems has experts, consulting services, and solutions ready to help strengthen your entire organization so you can truly effect digital transformation across your network. With the right solutions and professional services to assist your internal IT teams, we can help you modernize, protect, and manage your entire environment from our resilient cloud platform.
