

# ACCELERATE

Increase your security posture and protect your business from malicious traffic.

**Fw**  
Managed Firewall

## Navigate complex cyber security.

Security concerns continue to be a challenge for enterprises around the world. In fact, the Cost of a Data Breach Report 2022 showed that the average cyber incident cost \$4.35 million, on average.\* The cost was even higher for organizations that didn't deploy security artificial intelligence and automation — \$6.2 million.\*

As cyberattacks evolve, traditional firewalls fall short of providing comprehensive network protection. The ever-increasing complexity of cyber threats requires Managed Next Generation Firewall (NGFW) — Cisco protection along with continuous monitoring to provide a deeper level of security and visibility.

11:11 Systems Managed Next-Generation Firewall — Cisco is part of the 11:11 Managed Security portfolio and provides enhanced protection against modern threats such as advanced malware and application-layer attacks.

### Key Features and Benefits:

- 24x7x365 Security Operations Center (SOC)
- Intrusion prevention service (IPS)
- Security event reporting and forensics support
- Anti-malware protection
- URL filtering
- 15-minute time to notify SLA for critical events
- Geo-blocking
- Service availability SLA
- Log retention
- Protection against application-layer attacks

## Fortify your defenses to combat evolving cyber threats.

# Fw

Managed Firewall

Next-generation firewall protection, backed by security experts.

### **Traditional firewalls are not enough.**

Modern day threats require modern day protection against advanced malware and application-layer attacks.

### **Cyber security is a continuous challenge.**

Organizations face resource constraints such as time and personnel when it comes to cyber security.

### **Don't be buried in alerts.**

With 24x7x365 monitoring from our SOC, your internal resources can be freed up to focus on other value driving initiatives for your organization.

## Get what you need, when you need it.

We keep your business running all day, every day. We understand IT is a constant evolution that requires availability and resilience for complex hybrid environments. Our experts work with you to understand your business objectives, and then build a personalized plan to deliver the outcomes you need. We enable highly available, scalable, resilient and secure hybrid IT solutions to ensure you are always on.

## Need help transforming other areas of your environment?

11:11 Systems has security experts, consulting services, and solutions ready to help strengthen your security posture and plug potential vulnerabilities, from assessments and business impact analysis (BIA) to backup and disaster recovery services, business continuity plan development, and everything in between. We can help ensure your entire organization is cyber resilient.
