# Future Proof Legal Resilience

11:11 Consulting Services protect trust, confidentiality, and continuity for law firms under deadline pressure.

The Legal Sector at a Crossroads

The UK legal sector is operating in an increasingly complex and high risk environment. Law firms are navigating rapid digital transformation while facing escalating cyber threats, heightened client scrutiny, and growing regulatory expectations. Firms are under constant pressure to:

◆ Protect client confidentiality and legal privilege

◆ Remain operational when deadlines cannot move

◆ Defend against ransomware, extortion, and data exposure

◆ Demonstrate compliance with GDPR, SRA guidance, ISO standards, and client security audits

◆ Modernise infrastructure without compromising trust or availability

Yet legacy systems, fragmented vendors, and limited internal resources can leave resilience strategies incomplete. This puts client trust, regulatory standing, and firm reputation at risk.
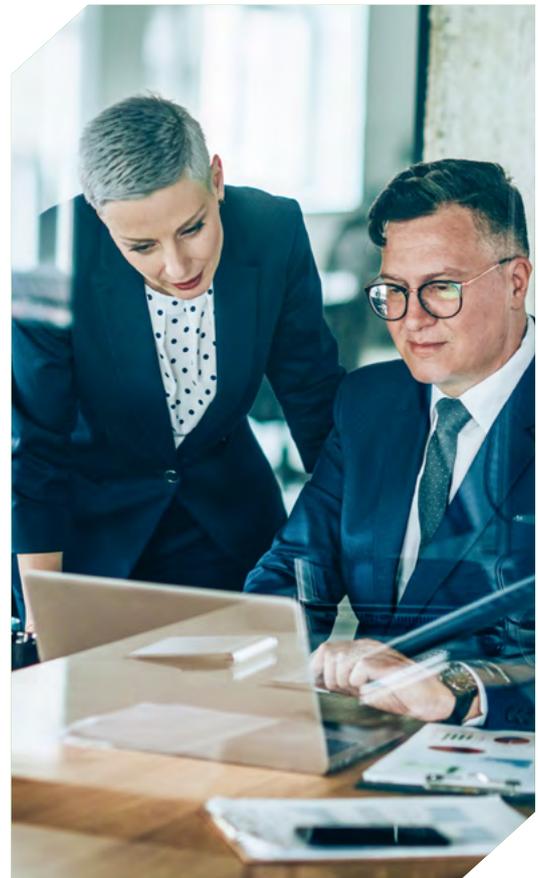

UK Law Firms Face:

Client Trust, Confidentiality and Data Sensitivity
Law firms manage highly sensitive information including privileged communications, litigation strategy, intellectual property, and personal data. A single breach can irreparably damage trust and expose firms to regulatory action and professional liability.

Ransomware and Extortion Risk
Cybercriminals increasingly target law firms due to the time critical nature of legal work and the value of confidential data. Ransomware and data exfiltration attacks can halt operations and force firms into high pressure response scenarios.

Always On Availability Under Deadline Pressure
Court deadlines, transaction timelines, and regulatory submissions are non negotiable. Even brief outages can result in missed filings, sanctions, deal delays, or malpractice exposure.

Regulatory and Compliance Complexity
Law firms must navigate overlapping obligations including GDPR, SRA Codes of Conduct, Law Society guidance, ISO 27001, and increasingly stringent client led security requirements.

Resource Constraints
Building in house cyber resilience, compliance, backup, and disaster recovery capabilities — alongside documentation, testing, and audit readiness — requires significant time, cost, and specialist expertise.

We Simplify Complexity. We Build Resilience.

Law firms need resilience strategies that protect trust without slowing the business. This is where 11:11 Systems can help. 11:11 Consulting Services delivers structured, compliant, and practical resilience programmes tailored to the legal sector.
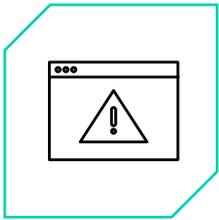

Assess and Identify Gaps
Comprehensive resilience, security, and compliance assessments aligned to GDPR, SRA expectations, ISO 27001, and client audit requirements. This includes detailed Business Impact Analyses (BIA) to identify critical legal services, system dependencies, and acceptable impact tolerances.
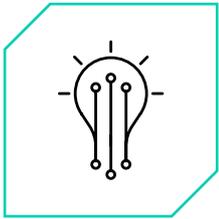

Design Integrated Resilience Strategies
We align cybersecurity, business continuity, backup, and disaster recovery into a single, cohesive programme. This includes end to end development and testing of Business Continuity Plans (BCP) and Disaster Recovery Plans (DRP) tailored to legal operations and deadline driven workflows.

Modernise Securely
Advisory services for hybrid and cloud migrations with embedded security, availability, and compliance controls. BCP and DRP requirements are built in from day one to ensure resilient transformation without disrupting legal services.

Streamline Vendor Management
Consolidate fragmented technology and service providers into a unified operating model with clear governance, accountability, and visibility — including centralised oversight of BCP/DRP readiness across third party platforms.

Achieve Audit-Ready Compliance
Gap analysis, reporting frameworks, and operational resilience testing (including BCP and DRP scenario simulations) to confidently demonstrate compliance to regulators, clients, and insurers.

Real World Legal Sector Expertise

We bring deep experience supporting regulated, trust based organisations where confidentiality, availability, and reputation are paramount.

◆ **Trusted Security Advisors**
Our consultants design resilience strategies incorporating 24x7x365 managed Security Operations Centre (SOC) services, immutable backup architecture, proactive threat mitigation, and legally defensible BCP/DRP playbooks.

◆ **Compliance Alignment from Day One**
We build solutions aligned to GDPR, SRA guidance, ISO 27001, and client security requirements — with audit ready outputs including BIA documentation, continuity plans, and validated DRP evidence.

◆ **Outcome-Focused Engagements**
Whether protecting case management systems from ransomware or ensuring availability ahead of court deadlines, we deliver measurable resilience outcomes tied to operational impact thresholds.

CASE IN POINT

Lessons from a Major UK Law Firm Cyber Incident

In 2024, a large UK law firm experienced a ransomware and data exfiltration attack originating from a compromised third party service provider:

◆ Document management and case systems were encrypted, halting operations firm wide

◆ Backup systems lacked immutability, extending downtime beyond 24 hours

◆ Regulators and clients demanded immediate assurance and remediation evidence

◆ Reputational damage resulted in lost client confidence and significant recovery costs

How We Would Have Helped

11:11 Consulting mitigates these risks through:

◆ Third party and supplier risk assessments

◆ Immutable backup architecture and orchestrated disaster recovery

◆ Formalised BIA to prioritise critical legal services

◆ Tested, documented BCP and DRP frameworks

◆ Incident response planning aligned to regulatory and client expectations

Protect Trust. Meet Deadlines. Stay Resilient.

With 11:11 Consulting Services, law firms can transform resilience challenges into a strategic advantage. We help your firm:

Build cyber resilience without compromise

Establish BIA informed BCP and DRP programmes

Modernise securely and confidently

Demonstrate regulatory and client compliance

Remain operational when deadlines cannot move

READY TO SECURE YOUR FIRM'S FUTURE?
