

SECURE

Get advanced ransomware protection and immutable backup.

Secure, reliable, and cost-effective storage for your long-term archives.

Data is the backbone of your organization, but in an era of escalating cyber threats like ransomware, traditional backup strategies are no longer enough. The increasing frequency and sophistication of these attacks mean that a standard backup can become a primary target, putting your entire business at risk. Protecting your data now requires a more robust, multi-layered approach to ensure you can recover quickly and completely from any incident.

11:11 Cyber Vault for Veeam empowers you to protect your mission-critical data with a secure, reliable, and cost-effective archiving solution.

Built on resilient Amazon Simple Storage Service (S3) cloud infrastructure, this premium object storage solution seamlessly integrates with all Veeam solutions, ensuring compliance with 3-2-1 backup best practices. Our compliance-grade, immutable storage eliminates egress and API fees, providing predictable costs and the peace of mind that your long-term archives remain locked down, audit-ready, and fully accessible when you need them most.

As digital transformation initiatives accelerate, the volume of mission-critical data continues to grow exponentially. This rapid data expansion often drives up IT operational costs and complicates long-term retention and compliance strategies. By leveraging secure and scalable S3 object storage, you can manage your growing data archiving requirements safely and securely. 11:11 Cyber Vault for Veeam provides a simple way to address the complexities of managing long-term data storage while ensuring your backups are safe, offsite, and in the vault.

Protect your data from the worst threats with 11:11 Cyber Vault for Veeam.

Key Features:

Seamless Veeam Integration

Integrate with all Veeam solutions and effortlessly streamline your data protection strategy to ensure offsite backup copies align perfectly with 3-2-1 best practices.

Unmatched Security and Cyber Resilience

Deploy ironclad, cloud-based security protocols with end-to-end encryption to protect your archives against ransomware, hackers, and environmental risks.

Cost-Efficient Scalability

Optimize your IT budget with predictable costs. We eliminate egress and API fees, while advanced deduplication and compression keep your total cost of ownership (TCO) low as your storage demands grow.

Future-Proofed Compliance

Navigate complex regulatory frameworks effortlessly with compliance-friendly workflows built into the platform, ensuring you remain audit-ready for HIPAA, SOX, GDPR, and more.

Simplified Data Management

Minimize operational complexity with intuitive workflows that make archiving and retrieving your critical data simple, giving your cross-functional teams more time to innovate.

Need to ensure other areas of your business are cyber resilient?

11:11 Systems has experts, consulting services, and solutions ready to help strengthen your entire organization, so you can truly effect digital transformation and cyber resilience across your network. With the right solutions and professional services to empower your IT teams, we can help you modernize, protect, and manage your entire environment from our resilient cloud platform.
