Simplify archiving and protect backups in the cloud.

Add affordable, immutable, long-term retention to the Zerto protection you already have.

Whether you're starting your digital transformation journey or have already moved workloads to the cloud, questions about complexity, compliance, and cost are likely top of mind. How can your business tackle these challenges? Embracing the cloud has the power to transform your IT and infrastructure—especially when your organization chooses a cloud platform designed for simplicity, security, and transparent pricing.

Zerto delivers exceptional continuous data protection and disaster recovery, but many organizations still need a cost-effective way to keep data for the long term — for compliance mandates, regulatory audits, and recovery from cyber events. Traditionally, meeting those requirements has meant bolting on a separate backup product, adding cost, complexity, and another vendor to manage.

11:11 Cyber Vault for Zerto solves this by extending your existing Zerto environment with secure, off-site, immutable long-term retention.

It combines Zerto's Extended Journal (EJ) capability with 11:11 Object Storage for AWS, giving you a single solution for both short-term and long-term retention under a straightforward, economical cost model.

Built on Amazon Simple Storage Service (S3) and delivered on our resilient cloud platform, 11:11 Cyber Vault for Zerto keeps your archived data safe with offsite, immutable storage, while preserving the flexible recovery Zerto customers rely on — the ability to restore entire Virtual Protection Groups (VPGs), individual Virtual Machines (VMs), or specific files and folders when you need them.

Get long-term archives, without the premium price,
with 11:11 Cyber Vault for Zerto.

Simplify archiving and protect backups in the cloud.

11:11 Cyber Vault for Zerto provides optimized replication and rapid recovery. Zerto's continuous replication technology cuts Recovery Point Objectives (RPOs) to seconds and Recovery Time Objectives (RTOs) are nearly instantaneous. Our integrated Failover Wizard also delivers alerts and reports from the 11:11 Cloud Console to help you through the failover process. Whenever you need extra guidance, 11:11 experts are available to help.

Key Features:

Why 11:11 Systems

As part of the established 11:11 Cyber Vault product line, Cyber Vault for Zerto is built on secure, hardened cloud infrastructure and the same trusted patterns that power 11:11 Object Storage for AWS. It's delivered as a branded, easy-to-consume 11:11 service —with flexible purchasing, straightforward pricing, and 11:11 support behind it — so you can extend Zerto protection with confidence.

Flexible purchase options

Cyber Vault for Zerto is sold on a per-TiB basis using a reserved-plus-burst model: commit to a baseline reserved capacity and burst above it as your retention needs grow. It can be added on to new or existing Zerto DRaaS quotes or purchased for cloud-to-cloud and self-managed Zerto use cases.

Need help managing other areas of your IT environment?

11:11 Systems has experts, consulting services, and solutions ready to help strengthen your entire organization so you can truly effect digital transformation across your network. With the right solutions and professional services to assist your internal IT teams, we can help you modernize, protect, and manage your entire environment from our resilient cloud platform.
