

11:11 Subprocessors

11:11 Systems, Inc. (“11:11” or “we”) may engage third-party service providers (“Subprocessors”) that process customer personal data on our behalf in connection with the delivery of our products and services or the operation of our business. These Subprocessors may process, store, transmit, or otherwise access customer personal data only as necessary to perform the services for which they have been engaged and in accordance with applicable contractual and legal obligations. Unless otherwise specified, capitalized terms used herein have the meanings assigned to them in the applicable contractual agreements and service level agreements (SLAs) between 11:11 and its customers or partners. This notice is provided to ensure transparency and to comply with 11:11’s obligations under applicable data protection laws—including, where applicable, the General Data Protection Regulation (GDPR)—as well as our contractual commitments.

Prior to engaging with any Subprocessor, 11:11 conducts appropriate due diligence, assessing their privacy, information security, and data protection practices. 11:11 enters into written agreements with all Subprocessors, which include requirements for compliance with applicable data protection laws, implementation of security and confidentiality safeguards, and, where applicable, adherence to international data transfer obligations. Consistent with our least-privilege access policy, 11:11 restricts Subprocessor access to only the data necessary to perform the contracted services. Subprocessors are strictly prohibited from using customer, partner, or personal data for any purpose other than providing the contracted services on behalf of 11:11.

Not all Subprocessors process the same categories of customer personal data. The categories of personal data processed by a Subprocessor depend on the products or services purchased, the customer's interactions with 11:11, and the specific services the Subprocessor performs on our behalf. Accordingly, not every Subprocessor applies to every customer, product, service, or interaction with 11:11.

The tables below identify the Subprocessors currently engaged by 11:11, including the type of services they provide and the geographic locations in which those services are performed.

Third-Party Infrastructure and Service Delivery Providers

The third-party service providers listed below are engaged by 11:11 Systems to support the delivery of specific products and services purchased by our customers. Depending on the services selected, these providers may process, store, or otherwise access customer content or personal data on behalf of 11:11 in accordance with applicable contractual commitments and data protection laws. Not all listed providers support every 11:11 product or geographic region. The applicable Subprocessors depend on the products, services, hosting locations, and configurations selected by each customer.

Third Party Service Provider	Processing Purpose	11:11 Products/Services Supported	Processing Location	Corporate Location
Amazon Web Services, Inc.	Cloud infrastructure and storage services ²	Cloud Object Storage, Cloud Backup, Cloud IaaS, Disaster Recovery, AWS-based Hosted Services	Varies based on the customer's selected data center region	United States
Cato Networks Ltd.	Secure Access Service Edge (SASE) ²	Secure Network Services, SASE, SD-WAN, Secure Remote Access	Global, customer-location dependent, primarily United States	United States
